

Special Issue

Managing Cybersecurity Threats and Increasing Organizational Resilience

Message from the Guest Editors

This Special Issue aims to bring together researchers from various fields of study. Researchers involved in single-discipline, inter-disciplinary and multi-disciplinary studies are welcome to submit a paper for peer review. Studies that address academic and industrial cybersecurity problems, and that provide insights into how cybersecurity threats can be dealt with, are welcome, as are papers that address current and future issues and challenges, and explain how managers and policymakers in both the private sector and the public sector deal with specific issues. A key focus of this Special Issue is to show how researchers are studying the complexities associated with various cyber attacks and how frameworks, models and concepts can be used to provide better intelligence so that the organization can be made more resilient.

This Special Issue will complement the existing literature and broaden our knowledge by placing cybersecurity within a wider context. The papers submitted are expected to cover a number of academic fields and link concepts and models with management applications and government policy.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Big Data and Cognitive Computing (BDCC) is a scholarly online journal which provides a platform for big data theories with emerging technologies on smart clouds and exploring supercomputers with new cognitive applications. It is a peer-reviewed, open access journal that publishes high quality original articles, reviews and short communications. The primary aims of this journal are to encourage contributions of high quality scientific papers relating to data management and analytics in industry, such as manufacturing, healthcare, education, media and business, data mining, and cognitive science. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Min Chen

School of Computer Science and Engineering, South China University of Technology, Guangzhou 510641, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q1 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Computer Science Applications)
