

Special Issue

Artificial Intelligence in Sustainable Reconfigurable Manufacturing Systems and Operations Management

Message from the Guest Editors

This Special Issue delves into the role of artificial intelligence (AI) in enhancing sustainable reconfigurable manufacturing systems and operations management. It aims to showcase pioneering research and practical applications where AI drives advancements in manufacturing systems toward greater sustainability and flexibility. By providing a platform for both researchers and practitioners, this issue intends to present innovative strategies, tools, and case studies that demonstrate how AI can enhance manufacturing systems and operations management, leading to a more sustainable and resilient status.

About the Journal

Message from the Editor-in-Chief

Big Data and Cognitive Computing (BDCC) is a scholarly online journal which provides a platform for big data theories with emerging technologies on smart clouds and exploring supercomputers with new cognitive applications. It is a peer-reviewed, open access journal that publishes high quality original articles, reviews and short communications. The primary aims of this journal are to encourage contributions of high quality scientific papers relating to data management and analytics in industry, such as manufacturing, healthcare, education, media and business, data mining, and cognitive science. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Min Chen

School of Computer Science and Engineering, South China University of Technology, Guangzhou 510641, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q1 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Computer Science Applications)
