COVID-19: Medical Internet of Things and Big Data Analytics

Message from the Guest Editor

The coronavirus pandemic, which began in January 2020, was a crisis that affected the entire world medically, socially, and economically. Most of the world was unprepared for such a catastrophe that overwhelmed the healthcare system and forced people to stay in their homes. The pandemic not only highlighted problems and unpreparedness in our current healthcare system, but also created the opportunity for telehealth and data analytics to come to the forefront. This Special Issue invites high quality papers that discuss COVID-19 and the medical Internet of Things and big data analytics. This can include but is not limited to the topics listed below.

Guest Editor

Prof. Dr. Newton Howard

About the Journal

Message from the Editor-in-Chief

Big Data and Cognitive Computing (BDCC) is a scholarly online journal which provides a platform for big data theories with emerging technologies on smart clouds and exploring supercomputers with new cognitive applications. It is a peer-reviewed, open access journal that publishes high quality original articles, reviews and short communications. The primary aims of this journal are to encourage contributions of high quality scientific papers relating to data management and analytics in industry, such as manufacturing, healthcare, education, media and business, data mining, and cognitive science. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Min Chen

School of Computer Science and Engineering, South China University of Technology, Guangzhou 510641, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q1 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Computer Science Applications)
