submissions:

**closed (20 September 2018)**

### Message from the Guest Editors

Dear Colleagues,

The Special Issue aims to collect contributions of the state-of-the-art on the multi-scale fluid dynamics of bubble columns. The main focus of the volume is on bubble column fluid dynamics without and with mass transfer by using theoretical, experimental, and numerical modeling approaches. Contributions concerning (a) bubble size and shapes and (b) flow regime transition prediction and modeling are strongly encouraged.

Dr. Giorgio Besagni

Dr. Thomas Ziegenhein

### Keywords

- multi-phase
- bubble columns
- flow regime
- experimental
- CFD
- Gas holdup
- bubble size and shape
- multi-scale
