

Special Issue

Advances in Bio-Fuels Production

Message from the Guest Editor

Continued industrialization and population growth have increased annual energy consumption. Increasing fossil fuel prices and greenhouse gases have motivated the research and development of renewable resources in many countries. Biofuel is a type of energy derived from renewable plant and animal materials. In general, biofuels are most useful in liquid or gas form because they are easier to transport, deliver and burn cleanly. Examples of biofuels include bio-alcohols (such as bioethanol, biobutanol), biodiesel and biogas (such as biomethane, biohydrogen). In this Special Issue of *ChemEngineering*, we want to offer a platform for high-quality publications on these various aspects of bio-fuels production. Manuscripts can be submitted until the deadline. All papers will be peer-reviewed. Accepted papers will be published continuously in the journal (as soon as accepted) and will be listed together on the special issue website. Research articles, review articles, as well as short communications are invited.

Guest Editor

Prof. Dr. Yu-Hong Wei

Graduate School of Biotechnology and Bioengineering, Yuan Ze University, Taoyuan 320, Taiwan

Deadline for manuscript submissions

closed (23 July 2019)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Mario J. Muñoz Batista

Department of Chemical Engineering, Faculty of Sciences, University of Granada, Avda. Fuentenueva, s/n, 18071 Granada, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q1 (General Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
