

## Special Issue

# Bio-Processing and Biochemical Engineering

### Message from the Guest Editor

A plentiful availability of lignocellulosic materials encourages the production of numerous commodities and applications to foods, chemicals, textiles, and biofuel sources. The versatility of lignocellulosic feedstocks to be processed into value-added products combined with a valuable opportunity to maximize their returns from the crops presents an important research topic. We would like to invite submissions to this Special Issue of *ChemEngineering* addressing this abovementioned area of research. Potential research topics include, but are not limited to, biological materials processing; process engineering for food, biofuels and bioproducts, renewable materials, bio-based product quality assessment, biomaterials, and biochemical catalysts; and value-added processing for agriculture, food systems, natural resources, and potential crops.

### Guest Editor

Dr. Daehwan Kim

Department of Biology, Hood College, 401 Rosemont Avenue,  
Frederick, MD 21701, USA

### Deadline for manuscript submissions

closed (31 August 2020)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Alirio E. Rodrigues

Laboratory of Separation and Reaction Engineering - Laboratory of Catalysis and Materials (LSRE-LCM), Department of Chemical Engineering, Faculty of Engineering, University of Porto, 4200-465 Porto, Portugal

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (General Engineering )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.8 days after submission; acceptance to publication is undertaken in 6.1 days (median values for papers published in this journal in the second half of 2024).
