# High Performance Biocomposites Reinforced by Natural Fibers: Recent Developments and Application s in Construction and Automotive Fields

# Message from the Guest Editor

This Special Issue is devoted to recent developments of high performance biocomposites, i.e., of polymer matrix composites reinforced by natural long fibers, characterized by mechanical performance which is higher than those of the polymer matrix alone. It covers all the main research activities related to advanced manufacturing processes, fibers treatments, mechanical characterization, and aging tests. The Special Issue is particularly focused on the applications of such materials in the construction and automotive fields, characterized by a high interest toward biocomposite having high mechanical performance in terms of static and fatigue strength, fracture and impact strength, and wear and aging, also in the presence of water or moisture. All original research works on these matters are welcomed, excluding review works and similar manuscripts.

### **Editor-in-Chief**

Prof. Dr. Mario J. Muñoz Batista

Department of Chemical Engineering, Faculty of Sciences, University of Granada, Avda. Fuentenueva, s/n, 18071 Granada, Spain

# **Author Benefits**

# **High Visibility:**

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

# Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q1 (General Engineering)

# **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
