# **Special Issue**

# Synthesis of Carbon Nanomaterials and Carbon Nanomaterial-Metal(Oxide) Composites and Their Applications in Catalysis

## Message from the Guest Editor

This Special Issue will focus mainly on new carbon and carbon-metal composites, their preparation methods and their applications in catalysis: heterogenous catalysis, electrocatalysis, photocatalysis and photo(electro)catalysis. In this context, the investigation of active catalytic sites (including carbon defects, metal structure, and carbon-metal interactions) by spectroscopic, microscopic, (electro)chemical and other characterization techniques, as well as of related properties, are within the scope of the issue. Likewise the Special Issue will cover all approaches providing an improvement of catalytic performance and related processes. We also welcome contributions on any aspect addressing the important problems of "oncarbon" catalysis and how to avoid the excessive stacking of nanocarbons, thus protecting their efficient surface area.

## Message from the Editor-in-Chief

#### **Editor-in-Chief**

Prof. Dr. Mario J. Muñoz Batista

Department of Chemical Engineering, Faculty of Sciences, University of Granada, Avda. Fuentenueva, s/n, 18071 Granada, Spain

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q1 (General Engineering)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
