

Special Issue

Functional Oxides for Heterogeneous Catalysis

Message from the Guest Editor

Heterogeneous catalysis is the engine of chemical industry. Without heterogeneous catalysis that enabled mass production of chemicals, the current society as we know now would have never been possible. Functional oxides can show emergent properties for heterogeneous catalysis alone or in tandem with dispersed metal. The existence of oxygen vacancies and other extended defects, along with new Operando characterization techniques, enriches the field of oxide catalyst more than ever. For this Special Issue on “Functional Oxides for Heterogeneous Catalysis”, researchers can report findings on oxide catalyst from experimental or theoretical approaches. Given your reputed experience in this field, and the outstanding impact of your previous publications, we would very much appreciate your contribution in this Special Issue of ChemEngineering.

- Catalysis
- Oxides
- Surfaces
- Defects
- Strong metal-support interaction
- Characterization
- Electronic structure

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Mario J. Muñoz Batista

Department of Chemical Engineering, Faculty of Sciences, University of Granada, Avda. Fuentenueva, s/n, 18071 Granada, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q1 (General Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.8 days after submission; acceptance to publication is undertaken in 6.1 days (median values for papers published in this journal in the second half of 2024).
