# Industrial Cultivation of Microalgae: Technologies, Applications and Challenges

### Message from the Guest Editor

Industrial applications of microalgae are constantly growing, and research is fervent. However, many issues remain uncovered that may hinder an efficient technological transfer from academia to the world of production. This Special Issue of *ChemEngineering* aims at updating our knowledge about technological and research advancements in this field. Modeling and experimental manuscripts, as well as reviews dealing with the most significant microalgal-related processes and operations, are particularly welcome.
