Special Issue

Ionic Liquids as New Alternative Engineering Solvents

Message from the Guest Editor

Articles selected for this Special Issue will cover a broad range of scientific research in subjects where ILs have been emerging as a promising alternative to the existing solutions. Both industrial and academic research involving ILs in different areas of chemical engineering, such as catalysis, environment, electrochemistry, energy, electrochemistry, biotechnology, materials, pharmaceutics, and separation processes can be considered to publication. In addition to the mentioned subjects, papers dealing with new areas of science and technology that fit the broad scope and objectives of the Special Issue are encouraged.

- ionic liquids
- chemical engineering
- catalysis
- environment
- energy
- electrochemistry
- biotechnology
- materials
- pharmaceutics
- separation processes

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Mario J. Muñoz Batista

Department of Chemical Engineering, Faculty of Sciences, University of Granada, Avda. Fuentenueva, s/n, 18071 Granada, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q1 (General Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
