

## Special Issue

# Novel Nanomaterials for Energy Storage Systems

### Message from the Guest Editor

This Special Issue covers recent advances in renewable energy conversion and storage, sensing, and electrical catalysis technologies. We therefore invite papers on scientific advances, new findings, case studies, reviews, as well as analyses, and numerical simulation that highlight the development of novel nanomaterials for energy storage and conversion devices. Articles selected for this Special Issue are subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments, and applications. We are writing to invite you to submit your original work/review articles/perspectives to this Special Issue. We look forward to receiving your outstanding research findings.

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q1 (General Engineering )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
