

Special Issue

Polymer Composites for Medical Diagnosis

Message from the Guest Editor

Medical diagnostic technologies have traditionally been centralised within hospital departments but recent advances in the design of functional materials have greatly expanded the opportunities to develop systems that can be deployed at the point of care. This Special Issue seeks to train a spotlight on polymer composites (new and re-purposed) that are helping to shape the medical/personal health diagnostics landscape. The journal welcomes high quality papers (review, perspective, communication or full research article) covering a broad spectrum of applications (hospital, clinic or community based). The main criteria is that the focus must be on polymer composites and how they influence diagnostic performance.

Guest Editor

Prof. Dr. James Davis

Nanotechnology and Integrated Bioengineering Centre, School of Engineering, Ulster University, Jordanstown BT37 0QB, UK

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Mario J. Muñoz Batista

Department of Chemical Engineering, Faculty of Sciences, University of Granada, Avda. Fuentenueva, s/n, 18071 Granada, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q1 (General Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
