

Special Issue

Advances, Intensification, and Emerging Technologies in Fluid Flow and Transfer Processes

Message from the Guest Editor

This Special Issue is devoted to novel solutions in the fluid flow and mass transfer processes. The application of mass transfer modeling and measurement technologies in both turbulent and laminar flows has a vast potential for the development of new industrial processes. Especially, the understanding of the industrial-scale multiphase process from lab to large scale needs efficient modeling and experimental methods to verify the design of the chemical processes and bioprocesses at hand. The purpose of this Special Issue is to bring new ideas from different branches of research to enhance the development of fluid flow and transfer processes.

Guest Editor

Prof. Tuomas Koiranen

School of Engineering Science, Lappeenranta University of Technology
LUT, Lappeenranta, Finland

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Alírio E. Rodrigues

Laboratory of Separation and Reaction Engineering - Laboratory of Catalysis and Materials (LSRE-LCM), Department of Chemical Engineering, Faculty of Engineering, University of Porto, 4200-465 Porto, Portugal

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q1 (General Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.8 days after submission; acceptance to publication is undertaken in 6.1 days (median values for papers published in this journal in the second half of 2024).
