Message from the Guest Editors

This Special Issue of the *International Journal of Neonatal Screening* on Newborn Screening for Cystic Fibrosis will focus on the state-of-the-art of the neonatal diagnosis of CF, with an emphasis on the different screening approaches and their advantages and disadvantages. It will also provide insight into the dilemma of the inconclusive diagnosis after NBS, now designated as CF screen positive, inconclusive diagnosis (CFSPID), and psychological impact on parents, as well as the monitoring of the performance of the screening.

Deadline for manuscript submissions:  
31 January 2020
