

## Special Issue

# A Lifespan Approach to Health and Well-Being Leveraging Neonatal Screening: Efforts in Advocacy, Academia, Research, and Clinical Care

### Message from the Guest Editors

Neonatal screening has the population-wide potential to improve the health and well-being of individuals throughout their lives. In the United States, over three million newborns, regardless of their parents' geographic location, race, economics, or educational level, receive screening for conditions that benefit from early identification and intervention. Discoveries in genomics that enable screening, diagnosis, treatment, and disease management throughout an individual's lifespan present an unparalleled opportunity to improve health outcomes and manage well-being beyond the neonatal period. This Special Issue features innovative efforts from communities who are helping to chart a course toward the use of a lifespan approach with the goal of assuring the best possible outcome for all newborns, their families, and their communities.

## About the Journal

### Message from the Editorial Board

The *International Journal of Neonatal Screening (IJNS)* is owned by the International Society for Neonatal Screening. The journal is a publishing platform for all topics concerning newborn screening and covers clinical presentations, metabolite pattern detection, technical aspects, and “tips and tricks”. “Tips and tricks” will appear in the form of “Technical Notes” on the journal website, thus making *IJNS* the platform for NBS laboratories to share their valuable information as to how they have improved assays, workflow, and performance. Such improvements are sometimes achieved through tiny adaptations of existing methods, which normally remain in lab journals, but which might help improve the performance of NBS laboratories around the world.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

#### Journal Rank:

JCR - Q1 (Pediatrics) / CiteScore - Q1 (Pediatrics, Perinatology and Child Health)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.7 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the second half of 2025).
