

Special Issue

Advances in IoT and Machine Learning for Smart Homes

Message from the Guest Editor

This Special Issue will focus on the transformative impact of integrating Internet of Things (IoT) technologies with machine learning techniques to create intelligent, efficient, and secure smart home environments. The proliferation of IoT devices in home automation has led to significant advancements in energy management, security, and user convenience, while machine learning algorithms enable these devices to learn from user behavior, anticipate needs, and provide real-time decision-making support. We invite submissions that explore the intersection of IoT, embedded systems, and machine learning in smart home applications. Topics may include novel IoT-based architectures for home automation, energy-efficient solutions, security and privacy concerns, as well as emerging applications such as intelligent health monitoring, smart appliances, and adaptive home environments. Contributions addressing challenges in real-time data processing, sensor integration, and power optimization in smart homes are particularly welcome.

Guest Editor

Dr. Tareq Hasan Khan

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Amiya Nayak
School of Electrical Engineering & Computer Science, University of
Ottawa, 800 King Edward Avenue, Ottawa, ON K1N 6N5, Canada

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,
and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 25.7 days after
submission; acceptance to publication is undertaken in 3.9
days (median values for papers published in this journal in
the first half of 2025).

Journal Rank:

JCR - Q2 (Telecommunications) / CiteScore - Q1
(Computer Science (miscellaneous))
