Special Issue

Industrial IoT as IT and OT Convergence: Challenges and Opportunities

Message from the Guest Editors

This Special Issue focuses on the innovative developments, technologies, and challenges related to the convergence of IT and OT in IoT application scenarios. This Special Issue seeks the latest findings from research and ongoing projects, also including practical use cases and detailed real-world deployment toward gaining new insights. Additionally, review articles that provide readers with current research trends and solutions are also welcome. The potential topics include, but are not limited to:

- Industrial Internet of Things use cases
- Architectural and networking innovation for OT/IT interoperability
- Cybersecurity for OT/IT convergence
- IoT security protocols and IoT networking and communication security
- Adoption of edge and fog computing for the shop floor
- Cloud and edge/fog synchronization, interoperability, and hybrid architectures
- Multiple access network technologies management, e.g., 5G/fiber/ethernet
- Management of protocol heterogeneity and translation
- Digital twin as a technological enabler for new IIoT architectures and deployments

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Amiya Nayak

School of Electrical Engineering & Computer Science, University of Ottawa, 800 King Edward Avenue, Ottawa, ON K1N 6N5, Canada

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.7 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).

Journal Rank:

JCR - Q2 (Telecommunications) / CiteScore - Q1 (Computer Science (miscellaneous))
