

Special Issue

Future of Business Revolution by Internet of Business (IoB)

Message from the Guest Editor

The aim of this Special Issue is to report on new scenarios, technologies, and applications related to the concept of the Internet of Business (IoB) and discuss challenges and risks on future of business revolution. Examples of this work include the description of new business models and new operating methodologies related to all business sectors, the impact of the digital transformation on the players of these business sectors, new policies and strategies for the monitoring and control of these business activities, and new models of data monetization in business. The Special Issue also aims to cover the impact of 4.0 technologies on business, including the large-scale deployment of IoT, the employment of big data and machine learning for business forecasting, the use of cloud platforms for the control of smart business, the new cyber-risks for the business sector and the future of business.
