

Special Issue

Unmanned Aerial Vehicles (UAV) and IoT

Message from the Guest Editors

This Special Issue is aimed at the two interrelated communities of IoT and Drones. We are interested in articles that focus on all aspects of the application of UAVs making use of IoT technologies. These include but are not limited to:

- IoT sensors for UAVs;
- Navigation technology;
- UAV path-planning and trajectory optimization for energy efficiency;
- Architectures, protocols, frameworks and applications of IoT for UAVs;
- Security and privacy for IoT in UAVs;
- Swarms of drones that offer efficiency and robustness in performing complex tasks;
- Battery and energy management in UAV-based networks;
- Energy-aware SDN for UAV networks;
- Other topics—recognition of objects, path planning, collision avoidance, communication technique, robustness against disturbances, applying machine learning, etc.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Amiya Nayak
School of Electrical Engineering & Computer Science, University of
Ottawa, 800 King Edward Avenue, Ottawa, ON K1N 6N5, Canada

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,
and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 25.5 days after
submission; acceptance to publication is undertaken in 5.3
days (median values for papers published in this journal in
the second half of 2025).

Journal Rank:

JCR - Q2 (Telecommunications) / CiteScore - Q1
(Computer Science (miscellaneous))
