

Special Issue

Advanced Quality of Service Approaches in Edge Computing

Message from the Guest Editors

The topics of interest of this Special Issue include, but are not limited to:

- QoS-aware architectures for Edge Computing systems.
- QoS-driven design of edge-based applications and services.
- QoS requirements for verticals based on Edge Computing.
- QoS-oriented resource allocation for Edge Computing systems and mobile networks.
- QoS-driven orchestration and migration of services in Edge Computing systems.
- Artificial Intelligence for QoS in Edge Computing systems.
- QoS-aware Network Function Virtualization and Software-Defined Networking for Edge Computing.
- Network slicing approaches for QoS in Edge Computing systems.
- Modeling and simulation of QoS in Edge Computing systems.
- Performance evaluation of Edge Computing-based applications and services.
- Performance evaluation of Edge Computing-enabled networks.
- Real experiments and testbeds of Edge Computing systems.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Amiya Nayak
School of Electrical Engineering & Computer Science, University of
Ottawa, 800 King Edward Avenue, Ottawa, ON K1N 6N5, Canada

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,
and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 27.8 days after
submission; acceptance to publication is undertaken in 4.8
days (median values for papers published in this journal in
the second half of 2024).

Journal Rank:

CiteScore - Q1 (Computer Science (miscellaneous))
