Special Issue

Software Defined Networking for IoT

Message from the Guest Editors

We are inviting contributions in the following areas, as well as others that are related to software-defined communications (e.g., Software Defined Radios):

- IoT applications using Software Defined Network control and management
- Architectures for Software Defined IoT networks
- South-bound protocols for network control and state collection
- SDN controllers for IoT networks
- In-band collection of network state
- Centralised algorithms for network control and optimisation
- Virtualisation and slicing of IoT networks to implement multi-tenancy: resource management algorithms and network multiplexing techniques
- Low-cost Software Defined Radios for IoT devices.
- SD-WAN for IoT deployment

Guest Editors

Dr. Victor Cionca

Computer Science Department, Munster Technological University, T12 P928 Cork, Ireland

Dr. Saqib Rasool Chaudhry

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Amiya Nayak
School of Electrical Engineering & Computer Science, University of Ottawa, 800 King Edward Avenue, Ottawa, ON K1N 6N5, Canada

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.7 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).

Journal Rank:

JCR - Q2 (Telecommunications) / CiteScore - Q1 (Computer Science (miscellaneous))
