

## Special Issue

# Edge Computing Optimization Using Artificial Intelligence Methods

### Message from the Guest Editors

The growing importance of the Internet of Things (IoT) and the ubiquitous high capacity provided by 5G technologies have brought the specter of massive quantities of data being generated and/or consumed by sensors, actuators, and smart devices. Such massive amounts of data require considerable processing power, which is available in the cloud. However, cloud-based computation and data delivery models do not allow the stringent quality of service (QoS) guarantees to be efficiently harnessed. For this Special Issue, original scientific articles are welcome on the following as well as closely related topics:

- AI-based algorithms to optimize job placement in EC
- AI software architectures favoring distributed computing job placement in EC resources (e.g., Distributed Deep Neural Network architectures)
- AI-based mechanisms supporting open EC markets leveraging the participation of third-party computing resources opportunistically (e.g., parked autonomous vehicles)
- AI-based methods to optimize mobile EC resources' placement (e.g., EC capable drones)

---

### Guest Editors

Prof. Dr. António M.R.C. Grilo  
Prof. Dr. Paulo Rogerio Pereira  
Dr. Naércio Magaia

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Amiya Nayak  
School of Electrical Engineering & Computer Science, University of  
Ottawa, 800 King Edward Avenue, Ottawa, ON K1N 6N5, Canada

---

#### Author Benefits

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,  
and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 24.2 days after  
submission; acceptance to publication is undertaken in 3.8  
days (median values for papers published in this journal in  
the first half of 2026).

##### Journal Rank:

JCR - Q2 (Telecommunications) / CiteScore - Q1  
(Engineering (miscellaneous))
