

Special Issue

IoT for the Smart Traffic

Message from the Guest Editor

In this special issue, we welcome research focused on the application of IoT in the smart city concept, with a focus on smart traffic applications. We encourage work that uses deep learning, artificial intelligence, urban microsimulation, etc. in an original and creative way. We expect both research and review articles submissions. If you would like to contribute to this special issue, we would greatly appreciate receiving a provisional title and summary of your contribution by email.
