Deadline for manuscript submissions: closed (31 August 2023)

Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to bring together contributions that could highlight the potential of new materials and combinations of different acoustic properties in order to maximize their effects on the acoustic performance of indoor and outdoor environments.

This invitation for contributions is addressed to manuscripts in the form of research articles, review articles, and case study investigations that combine theoretical research and applications related to the design, modeling, optimization, fabrication, and acoustic characterization of acoustic materials. Moreover, we invite submissions on real applications and simulations in different environments as well as subjective investigations on the effectiveness of the applications for this Special Issue.
