Vehicle Modeling and Control

Message from the Guest Editors

Dear colleagues, As the demands of people on the move are increasingly enhanced, the requirements on vehicle quality are also increasing. The study of vehicle modeling and control has long been an important key to achieving this goal. While the study of vehicle modeling has been carried out from the moment cars were put into service, in order to get ever-better cars, this field has never reached its limit. As the mechatronics and advanced control methods

- Vehicle/system modeling and identification
- Vehicle dynamics and control
- Fault detection and fault tolerant control
- Advanced control for vehicles
- Active/semi-active safety systems
- Electric vehicles, intelligent vehicles, autonomous vehicles

About the Journal

Message from the Editorial Board

We are just entering the Next Wave of Technology (NWT) where actuators will play the same role as the computer chip did for computers/social media approximately four decades ago. Just in the U.S., production of \$1 trillion year of electromechanical systems (vehicles, orthotics, manufacturing cells, freight trains, aircraft, etc.) will be impacted by the NWT, all driven by actuators. Five key trends can be found for the future perspectives: "Performance to Reliability", "Hard to Soft", "Macro to Nano", "Homo to Hetero" and "Single to Multi functional". We invite papers that primarily impact these economic sectors; those illustrating basic scientific principles are also welcome.

Editors-in-Chief

Prof. Dr. Kenji Uchino

Emeritus Academy Institute, The Pennsylvania State University,
University Park, PA 16802, USA

Prof. Dr. Norman M. Wereley

Department of Aerospace Engineering, University of Maryland, 3179J
Martin Hall, College Park, MD 20742, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within SCIE (Web of Science), Scopus, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1
(Control and Optimization)
