

Special Issue

Model Predictive Control in Mechatronic, Robotic, and Networked Systems

Message from the Guest Editors

Model predictive control (MPC) has received increasing interest among researchers and control practitioners in industries. Contributions from all fields related to Model Predictive Control in Mechatronic, Robotic, and Networked Systems are welcome to this Special Issue, including, particularly, the following:

- Decentralized, hierarchical, and distributed MPC
- Large-scale and cloud-based MPC
- MPC for cyber-physical systems
- Artificial intelligence in MPC
- Real-time implementation of MPC
- Applications of MPC in servo drives and electrical power drives
- Applications of MPC in industrial and mobile robotics
- Applications of MPC in industrial process control
- Applications of MPC in automotive systems
- Applications of MPC in networked and distributed systems

About the Journal

Message from the Editorial Board

We are just entering the Next Wave of Technology (NWT) where actuators will play the same role as the computer chip did for computers/social media approximately four decades ago. Just in the U.S., production of \$1 trillion year of electromechanical systems (vehicles, orthotics, manufacturing cells, freight trains, aircraft, etc.) will be impacted by the NWT, all driven by actuators. Five key trends can be found for the future perspectives: “Performance to Reliability”, “Hard to Soft”, “Macro to Nano”, “Homo to Hetero” and “Single to Multi functional”. We invite papers that primarily impact these economic sectors; those illustrating basic scientific principles are also welcome.

Editors-in-Chief

Prof. Dr. Kenji Uchino

Electrical Engineering, Emeritus Academy Institute, Pennsylvania State University, University Park, PA 16802, USA

Prof. Dr. Norman M. Wereley

Department of Aerospace Engineering, University of Maryland, 3179J Martin Hall, College Park, MD 20742, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within SCIE (Web of Science), Scopus, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1 (Control and Optimization)
