Message from the Guest Editors

Dear Colleagues,

The Special Issue we are proposing here is intended to discuss in what way can new forms of leadership present valid solutions towards problems that organizations are facing in the current economic scenario. We are thus seeking submissions that focus on the impacts of these new leadership approaches over the employee–organization relation to clarify if existing knowledge over leadership is still in a state of a “more than meets the eye” subject.

Relevant theoretical perspectives might include (but are not limited to):

- innovative leadership;
- sustainable leadership;
- responsible leadership;
- virtuous leadership;
- inclusive leadership;
- leadership and corporate social responsibility;
- diversity and leadership;
- leadership and changing work environments;
- leadership and internal communication;
- LMX;
- ethical leadership;
- transformational leadership.
