Message from the Guest Editors

Corporate social responsibility (CSR), innovation, and technologies are an unquestionable commitment of business to competitiveness, which allows them to correct high competition in all sectors and the fall in demand due in part to the economic crisis caused by the pandemic by COVID-19.

We welcome all methods and approaches and consider how STI change may come about and have larger effects on business and society at large. In addition, previous literature has focused mainly on environmental technological innovations, relegating to a second place the role that technological innovation can play in improving the management of safety and health at work and in other social dimensions of business activity.

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.
