Message from the Guest Editors

Dear Colleagues,

We have witnessed significant disruptions due to the pandemic resulting from COVID-19. Particularly operations and supply chains experienced unprecedented disruptions in lead-times and order quantities, fragilities in network structures, and severe demand fluctuations. The outbreak of the COVID-19 virus and its global effects have shed light on the scope and scale of the cascading effects on global supply chains. In totality, the COVID-19 virus has exposed several missing links in the global supply chain design and the degree of preparation that these organizations have made in response to such pandemics. Recently, some scholars have attempted to deepen our understanding related to the effects of the pandemic resulting from COVID-19 on global supply chains and their designs, yet most of this literature offers anecdotal evidence and lacks theory-grounded research...

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [RePEc](#), [EconBiz](#), and [other databases](#).

Journal Rank: JCR - Q2 (Management) / CiteScore - Q2 (General Business, Management and Accounting)
