### Message from the Guest Editors

Dear Colleagues,

We are seeking submissions for this Special Issue. This call is issued in the context of clearly growing interest in the conceptual building of innovative public administration, the use of modern management tools, specifically the possibility of using business models and digital management to increase the efficiency and pro-client orientation of public administration and the need to create intuitive tools to ensure the effectiveness of public policies.

This Special Issue will focus on all issues related to Public Administration, including but not limited to:

- digital management
- effectiveness
- sustainable development goals
- responsiveness
- participation
- citizens
- communities

The contributors may focus on the experiences of individual countries, or they may provide broader international perspectives. Comparative papers containing clear analyses of empirical data will be preferred, but interesting case studies leading to a better understanding of some specific phenomena are also welcome.
