### Message from the Guest Editors

The aim of the proposed Special Issue is to deeply investigate existing and/or new topics related to self-leadership in either a conceptual or empirical manner. Research directions to be followed include but are not limited to:

- What is the relationship between self-leadership and entrepreneurial success?
- Does the ability to self-lead one's self impact her ability to communicate to others within an organization and vice versa?
- What is the state of the art in terms of self-leadership measurement?
- What has been researched in terms of self-leadership theory in the past and what are future directions for the study of self-leadership?
- What are the international aspects of the study of self-leadership? Do different cultures self-lead themselves differently?
- Do emotions impact one's ability to self-lead themselves?
- What are the organizational/environmental conditions that enhance/impede successful self-leadership within organizations?
- Does one's fitness/health level relate to one's ability to effectively self-lead themselves?
