

## Special Issue

# Challenges and Future Trends in Digital Government

### Message from the Guest Editors

The Issue will examine the applications of digital government in diverse sectors, including education, health, tourism, services, and business, showcasing its potential impact across various industries. It will emphasize the involvement of relevant stakeholder groups and categorize the interactions between these groups and the government into different dimensions such as government-to-government, government-to-business, government-to-non-profit, government-to-citizen, government-to-visitor, and government-to-employee. Key factors for successful digital government services, identified as efficiencies, effectiveness, transparency, security, and trust, will be explored. The Issue will also discuss administrative reengineering as a strategy to optimize government operations through digitalization. This Special Issue welcomes the submission of case studies, comparative studies, research papers, and review papers to contribute to the exploration and understanding of digital government.

## About the Journal

### Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.
