

## Special Issue

# Government in the Digital Society: Shaping Civil Participation Through Technologies to Increase Personalization, Engagement and Action

### Message from the Guest Editors

It is important to continue to explore how the development of government digital services is impacting global environments and helping to shape our societal constructs as we move through this century. This Special Issue will explore how government is being shaped in the digital society, engaging with both the challenges (Harvey and Hastings, 2023) presented by connected government services and the wider societal benefits that such changes can and are facilitating. We are seeking submissions which will focus on research that demonstrates the impact of transformation of government services through an understanding of quantitative and/or qualitative data, through engagement with wide ranges of service users, including governmental, organizational and citizen users. This will enable further critical engagement with the impact of government in the digital society, to include how we might best shape service offerings in our governmental futures.

## About the Journal

### Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.
