Drivers and Barriers of Corporate Social Responsibility

Message from the Guest Editors

Corporate social responsibility (CSR) is one of the main considerations in the field of contemporary organizational management. Its potential benefits are widely known—not only its effect on economic performance, but also in reducing environmental impacts and developing the wellbeing of employees (Crane et al. 2019; Carroll and Shabana, 2010). As a consequence, the implementation of CSR practices helps to enhance the reputation and competitive positioning of companies. Regarding the human resources area, there are numerous studies that place special emphasis on analyzing the potential consequences of the development of a social orientation in human resource management (HRM) for such areas as the economy, environment, and society. However, these studies establish their main focus as employee performance and behavior, showing that HRM with a social orientation has a significant influence both on individual and organizational behavior (Snape and Redman, 2010)...

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.

Editor-in-Chief

Prof. Dr. Isabel-María García-Sánchez

Department of Business Administration and Economics, Universidad de Salamanca, 37007 Salamanca, Spain
