Artificial Intelligence and Government Transformation: Digital Government in Practice

Message from the Guest Editors

The rapid evolution of Artificial Intelligence (AI) has transformed the landscape of governance, redefining how governments design policies, manage resources, and deliver services to citizens. Once confined to the private sector, AI technologies are now integral to public administration, offering solutions for efficiency, data management, decision support, and citizen engagement. The aim of this Special Issue, titled “Artificial Intelligence and Government Transformation: Digital Government in Practice,” is to explore how AI-driven innovation reshapes governance systems, enhances public sector efficiency, and contributes to building transparent, accountable, and citizen-oriented administrations.

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.

Editor-in-Chief

Prof. Dr. Isabel-María García-Sánchez

Department of Business Administration and Economics, Universidad de Salamanca, 37007 Salamanca, Spain
