Re-designing the Entrepreneurship Policy Agenda Based on Individual and Context Singularities: Evidence from Gem

Message from the Guest Editors

Extant literature has pointed toward different entrepreneurship determinants, identifying individual characteristics which may enhance entrepreneurial initiatives. These may be related to contextual, cultural, institutional, social, regional, and economic aspects of a given geography; or individual characteristics such as age, gender, and risk aversion, considering self-perception of ability, self-efficacy, resilience, independence, self-confidence, and support from friends and family in the opportunity identification. Since context plays a role, cross-national benchmarking can be used for assessing policy effectiveness, considering circumstances and constraints... Prof. Dr. João Leitão

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.

Editor-in-Chief
