

Special Issue

Dynamic Capabilities for Sustainable Entrepreneurship and Sustainable Business Model Innovation

Message from the Guest Editors

In recent times, sustainable entrepreneurship as a research topic has gained significant attention in research into the business field. In this sense, the current body of literature broadly addresses the definition of sustainable entrepreneurship and its characterization. Thus, informed scholars have provided clear boundaries for sustainable entrepreneurship as a research topic, hence providing the definition of sustainable entrepreneurship. However, the process of how entrepreneurial capabilities associated with sustainability concerns are created and developed in businesses in their initial stages of development is still an unexplored topic, i.e., what exactly are sustainable dynamic capabilities and how do sustainable start-ups develop them? Thus, research addressing the abovementioned questions from a theoretical, empirical–qualitative, or empirical–quantitative viewpoint is welcome. Papers selected for this issue may also address theoretical and methodological developments.

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.

Editor-in-Chief

Prof. Dr. Isabel-María García-Sánchez

Department of Business Administration and Economics, Universidad de Salamanca, 37007 Salamanca, Spain
