

Special Issue

International Entrepreneurship: Past, Present, and Future

Message from the Guest Editor

To be all inclusive and include papers on a wide variety of issues, international entrepreneurship in this Special Issue is defined as: “the process of an entrepreneur conducting business activities across national boundaries”. This “crossing” can be looked in several ways:

- comparing entrepreneurs in different countries;
- analyzing aspects of international entrepreneurship, such as culture, entrepreneurial characteristics, organizational form and size, international market selection and entry strategy, political and economic systems and barriers that impact international entrepreneurship;
- developing and/or using theories to look at various aspects of international entrepreneurship; or
- approaching international entrepreneurship from various discipline perspectives providing a different view at the phenomenon.

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.
