

Special Issue

Operations and Supply Chain Management: Theoretical and Empirical Approaches

Message from the Guest Editors

The Special Issue will focus on publishing original research papers that explore the application and impact of theoretical and empirical approaches in operations and supply chain management practice and its real world applications in advancing manufacturing or service systems. This issue particularly welcomes research papers on the topic of operations and supply chain management for improving manufacturing/service operations. Submissions involving systematic literature review, empirical and modelling based work, real world case studies will be encouraged. We invite original manuscripts in the following (but not limited to) topics:

Operations Management across different sectors
Operations and Supply Chain strategies
Responsive and reconfigurable supply chains
Logistics and warehousing management
Container operations and supply chains
Humanitarian supply chain management
Lean/Agile systems
Quality Management & Operations Excellence
Multi channel operation management
Cold chain management
Risk management in supply chains
Healthcare operations and supply chain manage

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.

Editor-in-Chief

Prof. Dr. Isabel-María García-Sánchez

Department of Business Administration and Economics, Universidad de Salamanca, 37007 Salamanca, Spain
