

Special Issue

New Developments in Public Administration and Governance

Message from the Guest Editor

The overall aim of the Special Issue is to survey what new developments are happening in the field of public administration and governance using a social science perspective. This is a particular section of the administrative sciences field and has not only similarities but also differences from other sections. It aims to provide evidence and facts on new developments, rigorous analysis, and new insights into what administrative and governance developments might form promising possibilities in the future. The aim is also to be practically significant and theoretically interesting. This Special Issue intends to be inclusive in terms of the new developments addressed. That said, the scoping of the Special Issue has identified at least five critical new developments which should be addressed:

- New developments in strategic leadership.
- New approaches to strategic management.
- Agility: government and public sector organizations.
- Digital transformation and Artificial Intelligence.
- Public and private sector collaborations.

I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.

Editor-in-Chief

Prof. Dr. Isabel-María García-Sánchez

Department of Business Administration and Economics, Universidad de Salamanca, 37007 Salamanca, Spain
