On the Corporate Corruption of Science as a Profitable Business Strategy: An Institutional Approach

Message from the Guest Editors

From the 1970s to the early 1990s, a considerable stream of legal actions in different countries has allowed the disclosure of internal documents and memos of allegedly respectable corporations regarding their actual management of polluting or otherwise damaging activities for workers, consumers, or the collectivity at large. As a result, the darker aspects of business behavior are being empirically investigated by a growing number of disciplines and scholars, revealing the existence of a highly sophisticated and widespread pattern of criminal conduct. We welcome original manuscripts dealing with the wide-ranging interdisciplinary implications of the value-maximizing behavior of corporations based on hiding and manipulating information and discussion of the suggested institutionalist unifying conceptual framework for the study of corporate crime.

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.

Editor-in-Chief

Prof. Dr. Isabel-María García-Sánchez

Department of Business Administration and Economics, Universidad de Salamanca, 37007 Salamanca, Spain
