

## Special Issue

# Business Model Innovation for Sustainability in Small and Medium Enterprises (SMEs)

### Message from the Guest Editors

This Special Issue focuses on innovative business models for SME sustainability. It examines how SMEs develop, adapt, and transform their business models to integrate environmental, social, and economic goals. Emphasis is placed on the innovation processes, managerial practices, capabilities, and external factors that enable or hinder sustainable business model innovation in SMEs. We invite conceptual, empirical, or methodological submissions addressing sustainability-focused business model innovation across industries and contexts. Topics include, but are not limited to, sustainable value creation, circular models, digitalization for sustainability, stakeholder engagement, and relevant governance or policy frameworks. The issue has three objectives: 1) to advance theoretical understanding of how sustainability influences business model innovation in SMEs; 2) to provide empirical evidence on the behaviors, outcomes, and challenges of sustainable business models in smaller firms; and 3) to generate practical insights for entrepreneurs, managers, and policymakers fostering sustainable development through SMEs.

## About the Journal

### Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.
