

Special Issue

Risk Management of SMEs and Regional Development

Message from the Guest Editors

It is a well-known fact, that the existence of small and medium-sized enterprises (SMEs) is an important part of every economic system of the countries and their regions. They represent the actors of local markets, and their importance for regional development results from the characteristics that are attributed to them: they can quickly adapt to market requirements, they have an innovative function, they create new jobs and thus significantly affect the level of employment and many others. Although the topics about the role of SMEs in regional development, as well as risk management of SMEs are well elaborated, the connection between risk management of SMEs and regional development in a more comprehensive range is missing. Therefore, it is necessary to increase the level of knowledge about the possible causes and consequences of the risks, as well as the application of adequate measures to reduce them in the context of regional development. The special issue provides the possibility to publish the high-quality papers focused on issues of risk management of SMEs in connection with regional development.

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.

Editor-in-Chief

Prof. Dr. Isabel-María García-Sánchez

Department of Business Administration and Economics, Universidad de Salamanca, 37007 Salamanca, Spain
