

Special Issue

Collaboration Networks, Organizations, and Innovation

Message from the Guest Editor

This special issue aims to deepen our understanding of collaboration networks, organizations, and innovation, focusing on the integrative perspectives from various levels of analysis, including the levels of groups, organizations, regions, and countries. Continuous technological innovation is one of the main goals of firms. In particular, the intensive global competition and rapidly changing technology trends force firms to focus on innovative activities. In this situation, firms tend to choose to collaborate with external entities rather than pursue internal development as a strategic option. This is mainly because collaborations can provide potential advantages, such as access to external resources, the utilization of economies of scale and scope, synergistic effects through complementary knowledge sharing, and a reduction in risks. Interestingly, the emergence of the open innovation concept reflects recent trends focussing on innovation through collaboration. In addition, the successful achievement of the national innovation system is the result of cooperation among many organizations from industry, governments, and academia...

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.
