

Special Issue

University-Industry Collaborations and Academic Entrepreneurship: East Meets West

Message from the Guest Editors

The social and economic benefits of converting academic research into practical applications are undisputable. Hence, the issue of science commercialization is receiving considerable interest among policy makers and scholars across many fields. Two distinct literatures, examining the intersections between scientific research and commercial application, relate to university-industry collaboration and academic entrepreneurship. Research on such topics shares many of the same underlying issues, yet those topics are rarely considered jointly and these literatures seldom refer to each other. With this special issue we aim to bring together scholars from both domains to start filling these gaps. We look for contributions to advance theoretical development and empirical understanding of innovation and entrepreneurship involving university research, with a particular emphasis on comparative inter-institutional cross-country perspectives. Riccardo Fini
Einar Rasmussen
Maurizio Sobrero

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.

Editor-in-Chief
