

## Special Issue

# Greening the Organizations: Linking Employee Behaviors, Human Resource Management, and Environmental Concern

### Message from the Guest Editor

It is now difficult to deny the influence of human behavior on the natural environment. While a great deal of research has focused on individual's behaviors in private settings (households), few efforts have been undertaken in organizational settings for examining to what extent people at work adopts friendly or harmful behaviors towards the environment. An emerging trend within the organizational literature is that organizations may develop targeted HRM practices that help employees to perform pro-environmental behaviors to achieve environmental sustainability. This special issue seeks to address this issue. Although original empirical works (either quantitative or qualitative) are expected, conceptual papers are also welcome.

## About the Journal

### Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.
