

## Special Issue

# Can We Apply Business Strategy Analysis Concepts to the Public Sector?

### Message from the Guest Editor

There is increasing recognition that strategic analysis is a useful exercise for those public agencies with a reasonably clear and identifiable service delivery purpose. For strategic analytic purposes, it does not matter whether the public entity is a 'line' department or some form of quasi-autonomous or 'corporatized' entity, although these distinctions may well condition the specifics of the analysis. However, both the theoretical frameworks and analytic techniques and tools that are appropriate for public management generally and public agency strategic analysis specifically are quite open and, indeed, often contentious. Vining argues that some theoretical constructs and tools derived from private sector strategic analysis are useful for public sector analysis with appropriate modification; other public management scholars are more skeptical. The purpose of this Special Issue is to explore these issues.

## About the Journal

### Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.
