Innovating Public Sector through Digitalization

Message from the Guest Editor

Digitalization is everywhere and has achieved a new level and very different forms in the public sector, but there is not only one technology or form of digitalization. Rather, very diverse ideas and concepts exist within the public sector, which go far beyond better service delivery. Concepts like smart government/smart cities, open government, digital network government or government 4.0 are coming and can be already observed in very different forms. From an administrative science perspective, it is relevant to go beyond the technology perspective in order to better understand the process of innovation with its results. Especially, it is important to investigate the insights under which circumstance what kind of digital government innovation are coming up, and what factors influence such innovation with its results. We search for contributions that gives deep insights about the effects of information technology in public organization.

About the Journal

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.

Editor-in-Chief

Prof. Dr. Isabel-María García-Sánchez

Department of Business Administration and Economics, Universidad de Salamanca, 37007 Salamanca, Spain
