Message from the Guest Editors

This Special Issue is cooperating with the special session entitled “ECO-COMPASS: Ecological and Multifunctional Composites for Application in Aircraft Interior and Secondary Structures” that was organized at ICCS20 (Paris, France, 4–7 September 2017, <https://events.unibo.it/iccs20>). It will give the opportunity to present research activities carried out within the project and to disseminate recent results and achievements.

Authors of outstanding papers related to the ECO-COMPASS project are invited to submit their work to this Special Issue for publication, related but not limited to the following topics:

bio-composite; eco-composite; bio-fibre; bio-resin; multifunction green composites; characterization; modelling and simulation; applications; life cycle assessment; aviation

Advantages:

- Open Access
- High Visibility: indexed in the Emerging Sources Citation Index (ESCI - Web of Science) from Vol. 3, Scopus and Inspec (IET) from Vol. 4.
- Rapid Publication: submission to first decision: 21 days; acceptance to publication: 6.3 days
